

10A. ROI Scenarios

These are directional investor-return frames, not guarantees. They are included to show how the round can pencil if Oscar converts its current platform breadth into paid pilots, retention proof, and a repeatable launch package.

Scenario	Investor check	Potential value
\$2M invested at \$12M pre-money	Investor buys 14.3% post-money	If company reaches \$50M value, stake marks near \$7.1M before dilution.
\$2.5M invested at \$18M pre-money	Investor buys 12.2% post-money	If company reaches \$75M value, stake marks near \$9.1M before dilution.
ARR + IP proof case	\$2M ARR with 5-8x ARR quality range	\$10M-\$16M revenue-based value before strategic premium; Ultimate Bourré demand can support a strategic premium if compliant and documented.
